Free State to host Technological Days

Free State Department of Education and Mustek will host Technology Days on Wednesday 26 to Thursday 27 November targeted at the senior official, school principals, teachers and technology subjects advisors to inform them about technological developments in the classrooms.

The purpose of hosting Technological Days is for the Mustek to introduce and educate role players and decision makers about various technological equipments that could enhance learning and teaching.

The expected outcome is to have more technologically savvy officials, teachers and learners and encourage innovative teaching methods through technology keeping up with the developments of the 21st Century.

Education MEC, Tate Makgoe said the department advocates for the implementation of Information Communications Technologies (ICTs) in education in order to improve quality teaching and learning.

“We have responded to this policy directive by embarking on a venture to roll-out ICTs connectivity to rural and townships schools” Makgoe

In many parts of the world technology is harnessed with great effect to improve education outcomes,

Mustek is a leader in the field of technology in South Africa, manufacturing its own Mecer range of computers, laptops, tablets and other devices.

Different technological companies such as Macmillan and Via Africa who published e text books are afforded a platform to display their products at the event.
